PROFESSIONAL SUMMARY

Results-driven Python Developer and Data Analytics enthusiast with hands-on experience transforming raw datasets into actionable business intelligence. Proven ability to build forecasting models, conduct competitive research, and develop interactive reporting tools across cloud and BI platforms. Thrives in collaborative environments and eager to contribute to data-centric decision-making at scale.

EDUCATION

Invertis University, Bareilly

Bachelor of Computer Application

CGPA: 7.5 / 10

Relevant Coursework: Python Development, Data Analytics, Frontend Development

Bareilly, India

Graduated: June 2026

WORK EXPERIENCE

Google Cloud Virtual Internship — Data Analytics Intern

Apr 2025 – Jun 2025 | Remote

- Orchestrated scalable data pipelines on Google Cloud, using BigQuery to ingest, clean, and model large structured datasets for downstream reporting.
- Translated complex analytical findings into executive-ready dashboards, enabling stakeholders to monitor KPIs and make evidence-based decisions.
- Managed project timelines and documentation across multiple deliverables, applying agile practices to meet sprint goals consistently.

Code Soft — Python Programming Intern

Feb 2025 | Remote

- Engineered automation scripts in Python that eliminated manual data-entry workflows, cutting processing time significantly.
- Partnered with senior developers to debug, refactor, and document codebase modules, raising overall code quality and maintainability.

PROJECTS

TransactIQ - Forecasting India's Digital Payments Journey with UPI

- Processed and analysed over 10 million UPI transaction records (2019-2025) with Pandas and NumPy, detecting 15-20% recurring seasonal surges and measuring post-COVID acceleration in cashless adoption.
- Deployed an ARIMA time-series model that achieved 85% forecast accuracy, then surfaced projections in a Power BI report used to communicate future volume trends to non-technical reviewers.

Key Focus: Predictive modelling, time-series forecasting, large-scale data processing

Sportswear Meets Data - Analyzing Puma's Global Market Performance

- Mined 50,000+ U.S. retail records using Seaborn-driven exploratory analysis to map demand elasticity and category-level revenue concentration across Puma's product portfolio.
- Benchmarked Puma against key competitors, surfacing a 20% pricing gap and recommending a repositioning strategy estimated to generate an 8-10% uplift in net revenue.

Key Focus: Competitor benchmarking, pricing strategy, market intelligence

Meta Ads Campaign Analysis - Digital Advertising Performance Insights

- Interrogated 50,000+ ad-interaction records via advanced SQL queries, isolating audience cohorts and creative formats responsible for 20-30% above-average engagement rates.
- Developed a multi-page Power BI dashboard covering reach, click-through behaviour, and platform-time heatmaps; findings drove a 25% improvement in campaign optimisation efficiency.

Key Focus: Digital marketing analytics, SQL querying, interactive dashboard development

ACTIVITIES & LEADERSHIP

Smart India Hackathon — Member of Events

Oct 2025 – Nov 2025

- Collaborated in cross-functional teams to ideate, prototype, and pitch solutions to real government and industry briefs within tight deadlines.
- Strengthened structured problem-solving and rapid prototyping skills by tackling challenges spanning public infrastructure and emerging technology.

Google Developer Groups (GDG) — Member

Apr 2024 – Present | Lucknow, India

- Attended workshops and tech talks on cloud infrastructure, ML tooling, and Android development, broadening expertise beyond core data analytics.
- Built a professional network of developers and industry practitioners, fostering knowledge exchange and collaborative growth.

Internshala Student Partner

Apr 2025 – May 2025

- Championed internship awareness on campus, connecting peers with relevant opportunities and driving measurable growth in student sign-ups.

SKILLS

Programming Languages: Python, SQL, MySQL

Data Libraries: NumPy, Pandas, Matplotlib, Seaborn

BI & Reporting Tools: Power BI, Tableau, MS Excel, Google Sheets

Cloud & Big Data: Google Cloud Platform, BigQuery

Analytical Methods: Statistical Modelling, Time-Series Forecasting, Predictive Analytics, A/B Testing

Data Engineering: Data Cleaning, Data Preprocessing, ETL Pipelines, Data Modelling

Developer Tools: Git, GitHub, VS Code

Languages: English (Professional), Hindi (Native)

CERTIFICATIONS & TRAINING

- Data Analytics - Cisco
- Python with Data Science - IBM
- SQL - IBM
- Power BI - Microsoft Learn
- Google Cloud Data Analytics Certificate
